

PUMPED UP FOR PERFORMANCE!

Custom skid-mounted plumbing and HVAC systems for..

- Commercial Buildings
- Hotels
- Hospitals
- Schools/Churches
- Apartment Buildings/Lofts

If You Need to Pump it... NECO Has a System to Meet Your Specs.

NECO Equipment Company has been providing mechanical contractors in Plumbing and HVAC with precision-engineered pumping, lifting and circulating systems since 1989.

With thousands of systems in service throughout the Mid-Atlantic region, contractors have come to rely on NECO as their primary Design/Manufacturing resource for skid-mounted systems that provide high reliability and long service life...even under the harshest operating conditions.

NECO engineers have wide experience in solving some of industry's toughest fluid handling and heat transfer problems. They also have deep knowledge of what systems work best and will get the job done right. And since the company maintains a library of pre-engineered system designs, a field-proven solution can often be quickly provided to meet your requirements faster and more economically.

Manufacturing

The NECO fabrication shop is fully equipped and staffed with a trained team of engineers, welders and machinists for fast turnaround, high-volume production of skid-mounted pumping systems.

Design/engineering services are fully integrated with manufacturing and only the finest brand name products are incorporated into every skid-mounted assembly. Brands include:

- *Armstrong, PACO, Goulds, Grundfos, Lancaster, G&L, Trush* and *Tuthill* pumps
- *Cutler-Hammer, Yaskawa* and *ABB* motor starters/variable frequency drives
- *Cal-Val* and *Wheatley* valves and piping accessories
- *Raychem* and *Nelson* freeze protection products
- *AMTROL, John Wood, Xerxes* and *Modern Welding* tanks and pressure vessels

QC/Documentation

Every NECO system is factory-assembled, with UL approved controls utilizing NEMA 1 to NEMA 4X enclosures, and 100% tested and electronically certified prior to shipment to assure trouble free start-ups. All pumps and valves are tested prior to shipment and supporting documentation can be furnished upon request.

Complete customer drawings of all systems, including component brand names and serial numbers, are recorded and archived for future reference prior to shipment.

NECO Packaged Skid-Mounted Pumping Systems include:

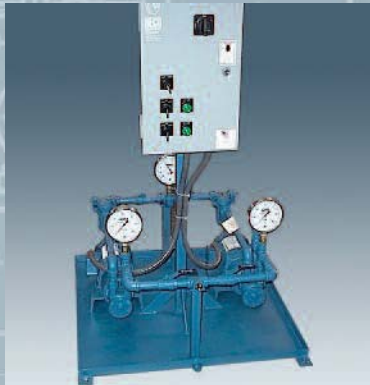

- Water Pressure Booster Systems
- Variable Speed Pumping Systems
- Sewage Lift Stations
- Elevator Sump Pumps with oil sensors
- Packaged Chilled Water and Hot Water Circulating Systems
- Heat Transfer Systems
- Fuel Oil Pump Sets
- Boiler Feed Systems
- Condensate Return Units, and more

Quickly and Affordably.

Triplex packaged circulating system

Engineering Assistance and Field Service Support

An experienced staff of engineers is always available to answer your questions, provide speedy quotations or help with the design for your next pumping project.

Specialists are also available to assist you at the time of installation and start-up at your job site; or, for emergency field service calls should they ever become necessary.

NECO also welcomes inquiries from OEM pump suppliers about manufacturing private label fluid handling and heat transfer systems utilizing their equipment.

Get Pumped Performance with NECO.

Call today. Or E-mail: sales@necoequipment.com. NECO sales engineers will see that you're provided with fast, accurate answers and quotes that add up to more affordable mechanical solutions.
